Projects In XTeam Consultants India Pvt. Ltd.

<https://sservicio.com/> 

Utilized **Livewire components** for building interactive user interfaces, handling form submissions, and updating views dynamically.

<https://inheritagex.com/> 

Add some features and create a custom plugin in **Wordpress**

<https://travel.xteamindia.com/> 

Developed and maintained dynamic web applications using **Laravel 11**, ensuring high-performance and scalable solutions.

<https://ilearnings.in/> 

Developed and managed the admin panel for a web application utilizing **Laravel 11**, with a focus on implementing role-based access control (RBAC) for users. Integrated the **Spatie Laravel Permission package** to efficiently manage user roles and permissions, ensuring granular control over access to various sections of the application. This setup enhanced security and streamlined user management, while also allowing for easy scalability in a dynamic environment.
