School Management System PHP / Laravel | MySQL | JavaScript | Bootstrap

8 Months

- Developed a comprehensive school management system to manage **student admission, attendance, fees, transport, and report cards**.
- Implemented **online admission module** with student registration and record management.
- Designed **attendance tracking system** for class-wise and section-wise student monitoring.
- Built **report card generation module** with subject-wise marks and printable format.
- Developed **fee management system** including admission fees, fee collection, and reports.
- Integrated **transport management** to assign routes and track student transport details.
- Created dynamic filters for class/section with optimized database queries.
- Ensured secure access using token-based URL authentication.
